

**Financial Statement Disclosures for December 31, 2023**

The following is the Public Trust Advisors, LLC (Fund Administrator) interpretation of your disclosure responsibilities related to your participation in the Michigan CLASS local government investment pools. The information provided may be required for the financial reporting of Participants in Michigan CLASS. Participants should consult their auditing and accounting professionals regarding their specific reporting requirements.

**GASB 79 Disclosure**

According to the Governmental Accounting Standards Board (GASB), in order for an investment pool to qualify for the use of amortized cost accounting for financial reporting purposes, it must meet all of the criteria listed in GASB Statement No. 79. Michigan CLASS is managed as stable value NAV pool, while Michigan CLASS EDGE is managed with a floating NAV, but they do not meet all of the specific criteria outlined in GASB 79 Paragraph 4, therefore Michigan CLASS Participants should report their investments in the pools at fair value. The value of your investment in Michigan CLASS as stated on your December 31, 2023 statement should be used as the fair value of your investment.

**GASB 72 Fair Value Hierarchy Reporting for Michigan CLASS**

Michigan CLASS measures its investments at fair value and therefore a Participant's investments in the pools are not required to be categorized within the fair value hierarchy for purposes of Paragraph 81a(2) of Statement 72\*.

A 'AAAm' rating by S&P Global Ratings is obtained after S&P evaluates a number of factors including credit quality, market price exposure, and management. Ratings are subject to change and do not remove credit risk. [Click here](#) for more information

The 'AAAF' rating is Fitch's opinion on the overall credit profile within a fixed-income fund/portfolio and indicates the highest underlying credit quality of the pool's investments. The 'S1' volatility rating is Fitch's opinion on the relative sensitivity of a portfolio's total return and/or net asset value to assumed changes in credit spreads and interest rates. The 'S1' volatility rating indicates that the fund possesses a low sensitivity to market risks. Weighted Average Maturity (WAM) calculates the average number of days until maturity for a portfolio of securities. WAM uses the next interest rate reset date, call date or put date in the calculation and therefore should always be less than or equal to weighted average life (WAL).

Weighted Average Life (WAL) calculates the average number of days until maturity for a portfolio of securities using the stated maturity date for all securities, including variable rate, callable or puttable securities.
